

**Walkmate®**

WILL BE A PARTNER OF REHABILITATION

A luxury rehabilitation medical equipment specialist company

**WINIZ** Winiz Co., Ltd.

Winiz Co., Ltd. manufactures and produces all of its products directly using patented technology through continuous research and development.

# Winiz Co., Ltd.'s founding philosophy

PHILOSOPHY

WE NEED

5H

Human  
Hear  
Health  
Happy  
Healing

## Winiz's Co., Ltd. is concerned about a **healthier life**.

We often take walking for granted. But for some—our neighbors, our families, even ourselves—it can be a struggle. Walking is a fundamental part of daily life and the foundation of rehabilitation.

At Winnies, we understand these challenges and are developing advanced rehabilitation devices based on ASFR, a new and evolving therapy method created in collaboration with clinical experts.

Through continuous research and development, we strive to improve lives and become a trusted partner in health and recovery.

Winiz Co., Ltd. CEO Jeong Bu-hwan

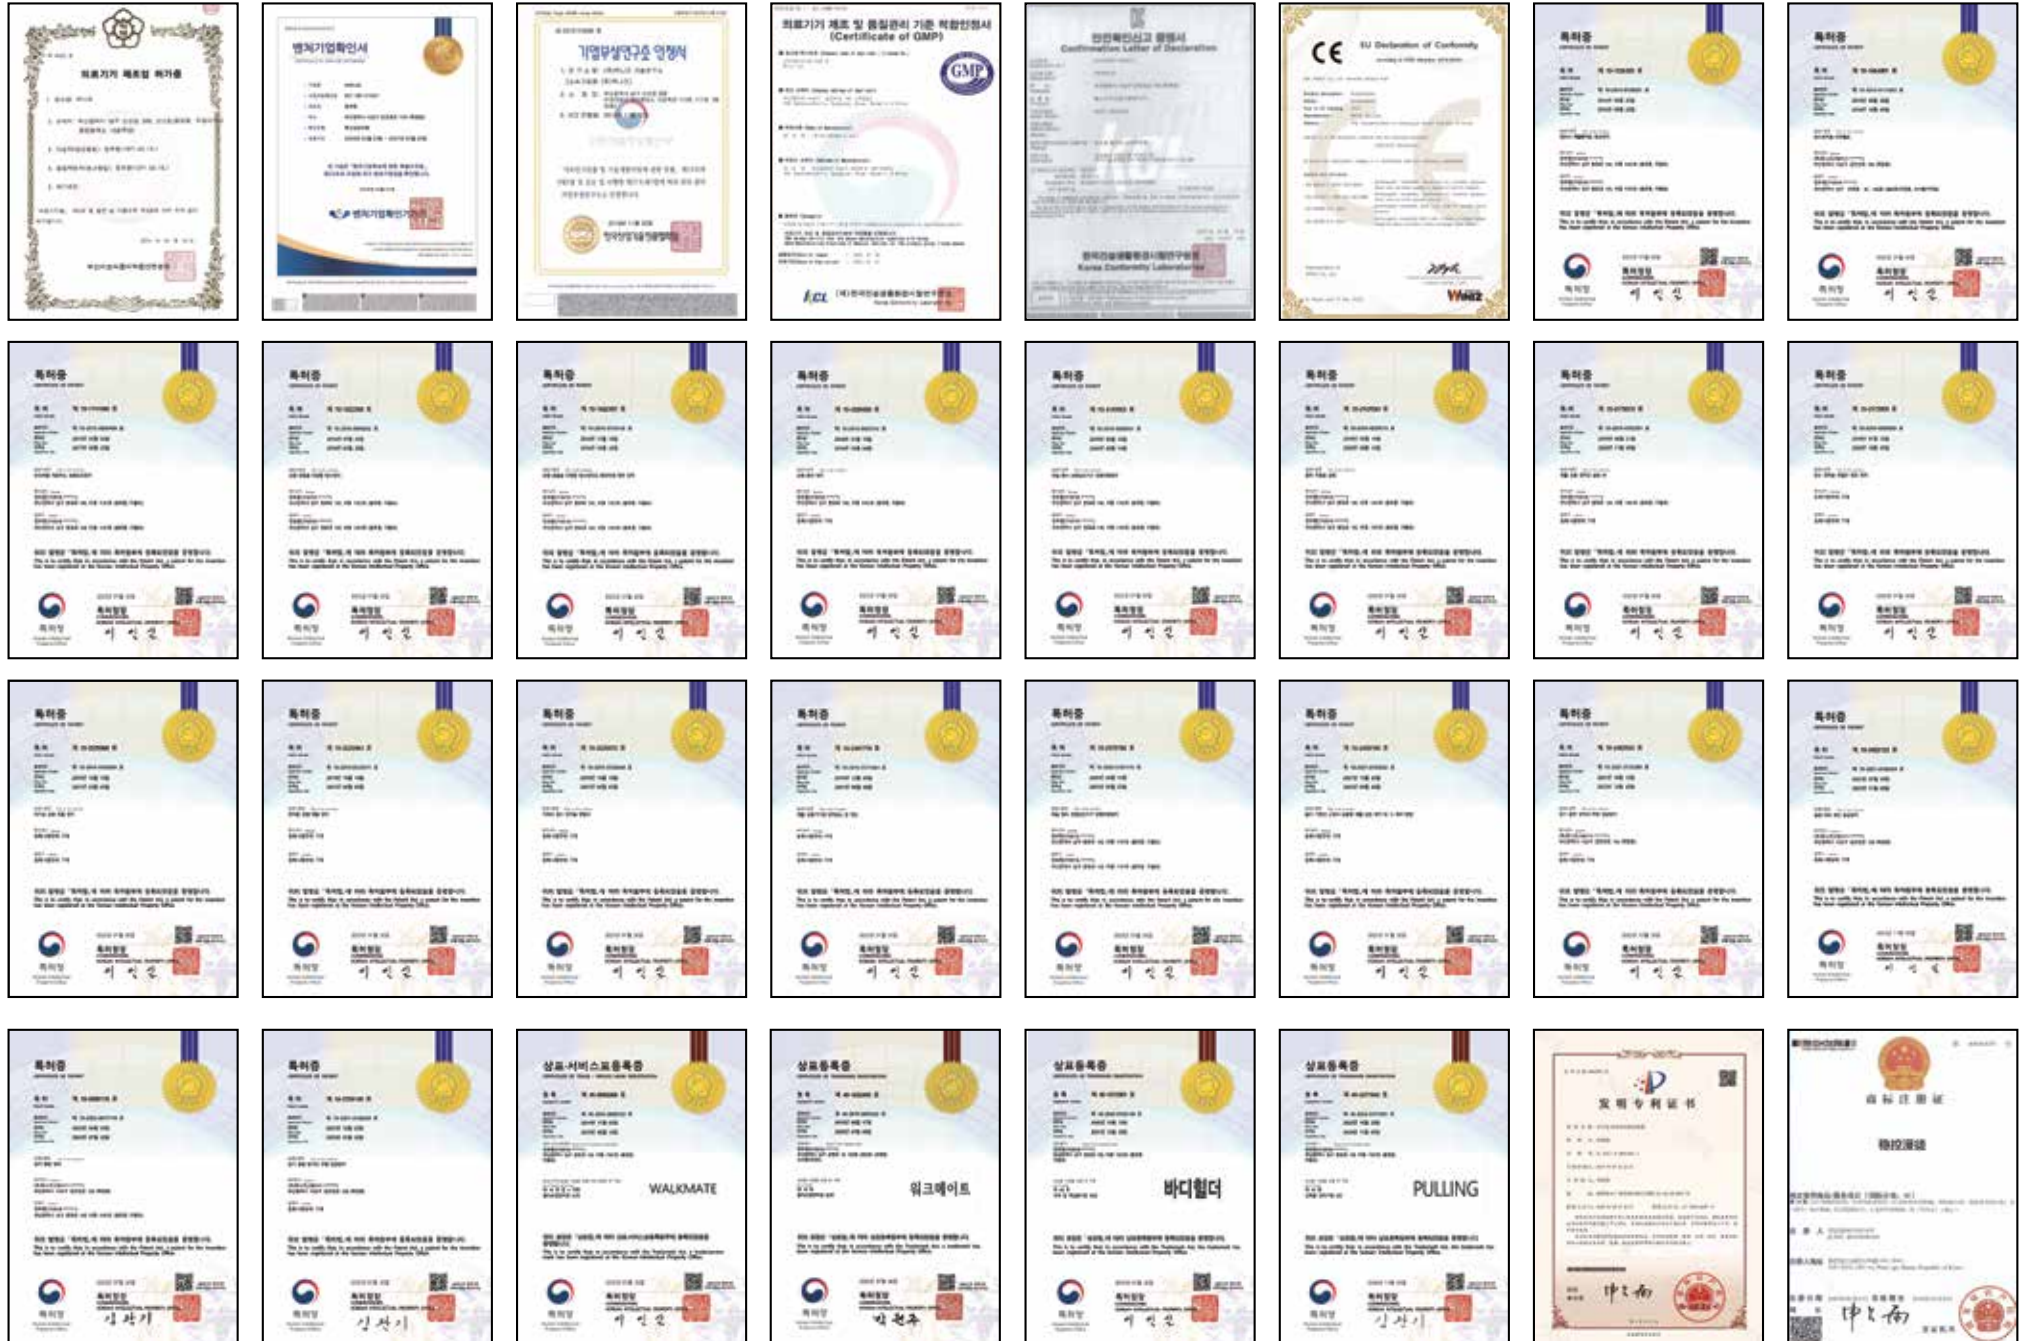

## Winiz Co., Ltd. History

- 2025** Supplied to over 800 institutions nationwide
- 2023** CE certified (European safety management conformity)
- 2022** Selected as the Republic of Korea Excellent Patent Award\_Korea Daily  
Public Procurement Service Venture Startup Innovation Procurement Product Designation (Body Header)  
Obtaining KC certification  
GMP Certification\_Certificate of Compliance with Medical Device Manufacturing and Quality Control Standards
- 2020** Development of Body Healer, a full body rehabilitation exercise device  
Acquired certification as a representative startup company in Busan  
Extension/Transfer\_156 Gamjeoncheon-ro, Sasang-gu, Busan  
Chinese patent registration (multi-directional suspension device for walking exercise)  
Chinese trademark registration
- 2019** Winiz's Co., Ltd.\_Conversion to Corporation  
Establishment of corporate research institute  
PCT application\_USA, China, Japan (Multidirectional suspension device for walking)

**Rehabilitation** is not an option,  
it is a **necessity!!!**

✓ **“Beyond care to independence”**

What is the real way for the elderly?

The beginning and end of  
**independence** is **walking !!**

Self-reliance = The beginning of  
human rights

Eating, going to the bathroom,  
washing, going for a walk, etc.

**All activities start with walking**

If walking is difficult,  
the end of the world that the  
elderly see is the **ceiling**.

**Walking** is essential for **independence** and **self-reliance**!

**Elderly needs  
walking**

Rehabilitation while  
lying down

Standing rehabilitation

## Various play rehabilitation

Rehabilitation specialist  
Nursing home/Day care center

Differentiated  
choice!!

Rehabilitation

Facility

**Walkmate®**

## Rehabilitation effect

right hemiplegic  
patient

After 3 days  
of using walkmate

After 20 days  
of using walkmate

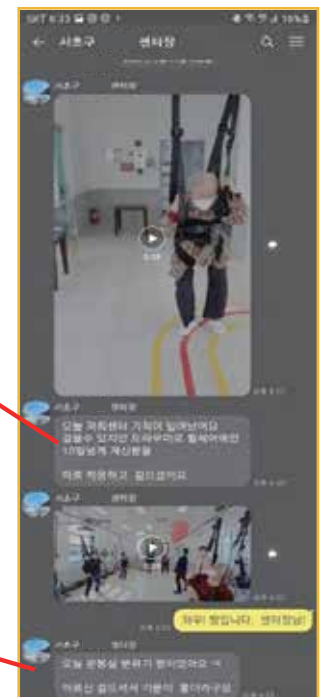

After a month  
of using Walkmate

**A miracle happened  
at our center today.**

A person who had been in  
a wheelchair for more than  
10 days was able to walk while  
wearing a separate device.

The atmosphere in the gym  
today was really good

**I felt good when the  
old man walked.**

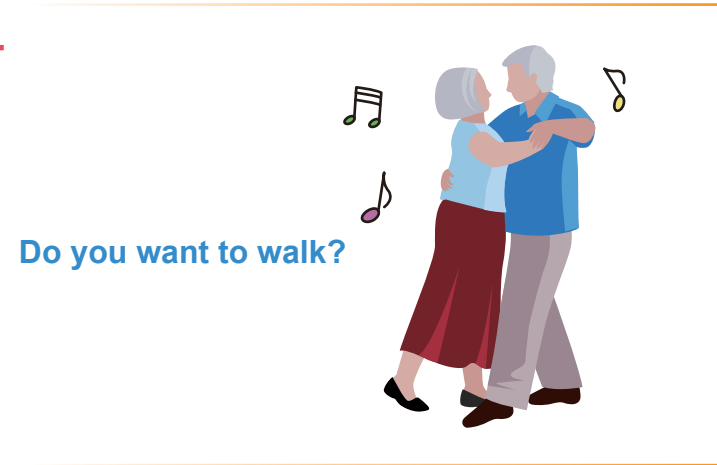

You can check product usage and various videos by scanning the QR code with your mobile phone camera.

What do you want?

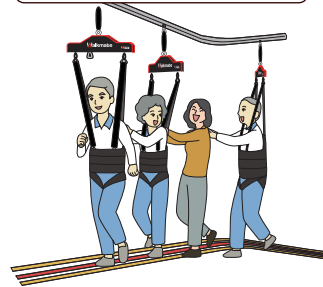

Walkmate Unused Institutions

passive function recovery training

No differentiation from other institutions

Gait rehabilitation

Walkmate

Institutions using Walkmate

Active functional recovery training

Differentiation strategy to attract customers

Rehabilitation is play!

passive rehabilitation

Do-it-yourself rehabilitation

play rehabilitation

Walkmate®

Interest and fun through play

Active, voluntary participation

Excellent whole body rehabilitation effect

The reality is that walking therapy cannot be sufficiently progressed due to the risk of falls! Treatments focused on mats or sitting postures are ineffective or may miss the treatment time.

# ASFR Active Standing & Functional Rehabilitation

## I want to walk too!

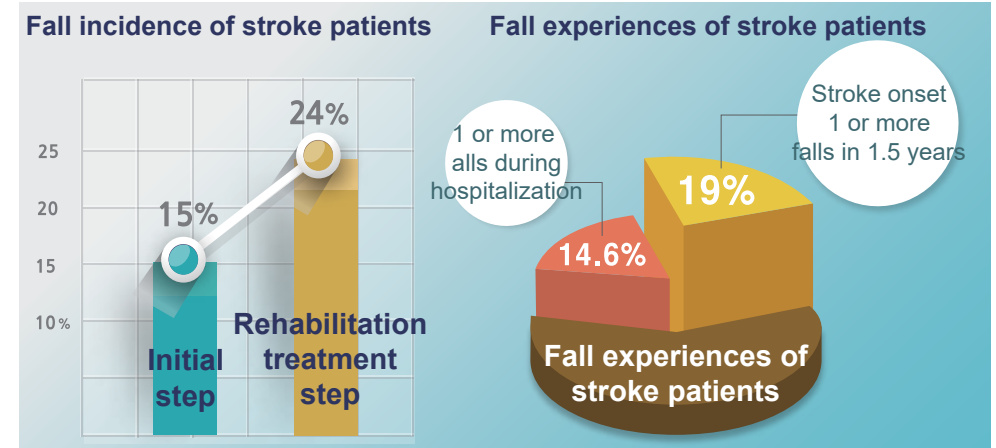

Rehabilitation therapy is the one that allows limited movement or activity to be functionally restored.

ASFR is a standing-oriented **functional rehabilitation** treatment that aims to induce **active participation** of patients from the onset of disability and to stand and walk earlier and more often.

It is a total rehabilitation that utilizes various tools and provides fun treatment through games and group therapy. It is a **new concept rehabilitation treatment method** that can further enhance the effectiveness of rehabilitation treatment through active participation of patients.

Since patients with walking disorders have complex functional limitations, the **entire body rehabilitation treatment** is required so that the entire body can coordinate and function.

ASFR is a complex rehabilitation therapy that solves systemic problems of the body rather than looking at the functional limitations of the patient as a local problem, and it is an **entire body rehabilitation intervention technique** that allows limited functions to be restored through systemic coordination.

# Customer Support

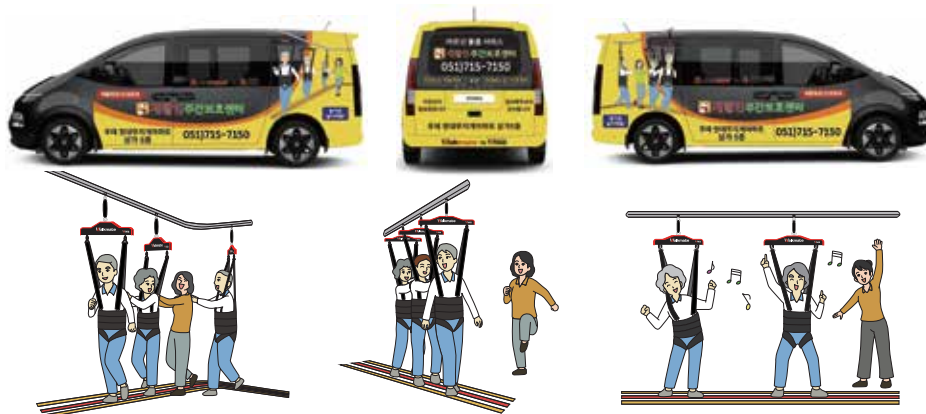

## Winnie's product installation has begun!!

From **promotion** to **education** and product **management**!  
Your relationship with Winnies starts now!

### Promotion of the facility

※ We help you **promote** your business.

※ Support for vehicle wrapping and various promotional materials

✓ Supports various wrapping images for center buildings, vehicles, etc.

※ Promote your blog post

✓ Posting of various organization information centered on major keywords so that it can be exposed in Internet searches

※ Winiz's homepage installation certification

✓ Product installation registration and search keyword exposure on the Winnie's homepage with high search traffic

※ Producing and posting YouTube promotional videos

✓ Our professional video editors will create a promotional video with detailed information about your organization!

※ Community Site Affiliation & Promotion

✓ Winnie's Launch Community Site Silverin Organization Promotion, Introduction, Information Provision

## Product Training

※ Play rehabilitation & product usage training

※ We provide direct instruction and training on product usage and play-based rehabilitation methods.

✓ We provide play-based rehabilitation methods through our programs.

✓ We provide detailed training on how to use the product.

✓ You can easily learn how to use it through videos anytime through the YouTube channel.

## Installation & A/S

✓ We produce only the best luxury products!!!

※ Accurate quality control

※ Use it with confidence. We directly manage the design, production, installation, and after-sales service of all products!

Design / Fabrication

Production / Manufacturing

Direct construction / installation

Thorough A/S management

Product Safety Testing

GMP Compliance Certificate for Medical Devices

※ Designed and manufactured in Korea through **precise quality control** using Winnie's **excellent technology**

Rail direction change device

Patent

The built-in brake technology that controls the left and right of the steering wheel is a patented technology exclusive to Workmate.

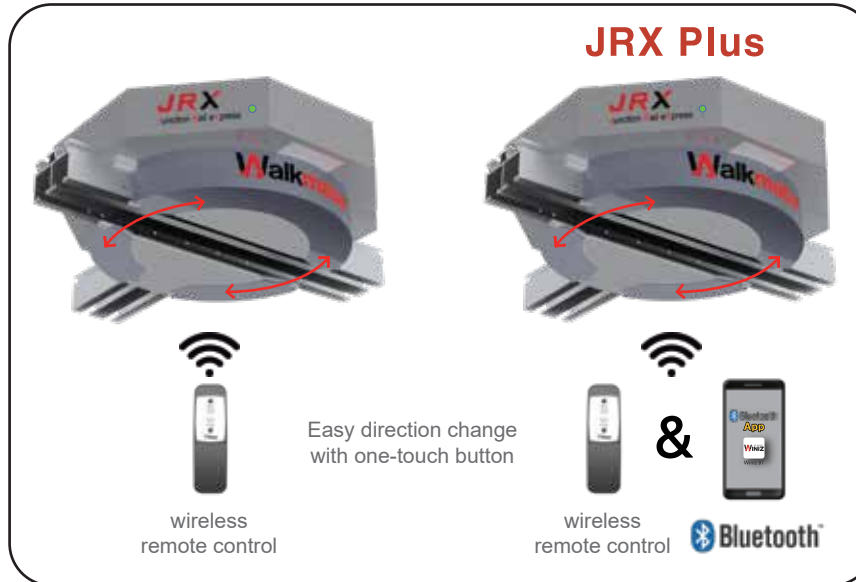

Passive

Pull the rope to change direction

Electric

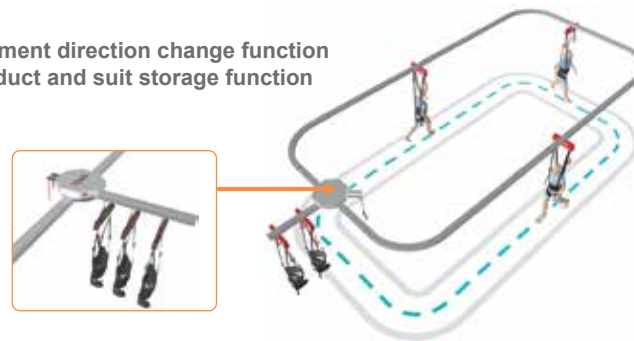

※ Durability Testing

Durability and stability have been verified through more than 100,000 round-trip rotation tests.

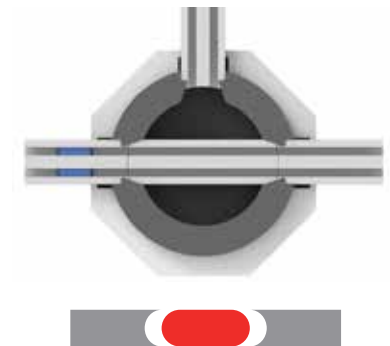

Movement direction change function  
Product and suit storage function

Can be installed in various forms to suit the user's environment (optional)

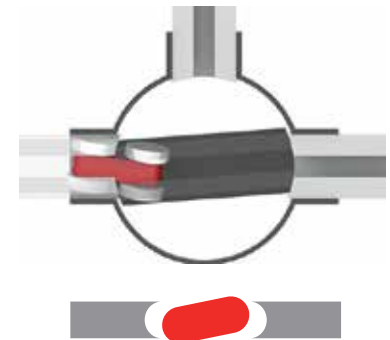

## Point

- Accurate rail alignment in the turning section
- Smooth wheel drive in the turning section
- Brake system - complete fixation of the turntable

## Disadvantages of existing products

- Occurrence of wheel jamming in the turning section
- The turntable may be misaligned
- Wheel jamming causes serious inconvenience in use.

※ All products of WINIZ are directly produced in Korea

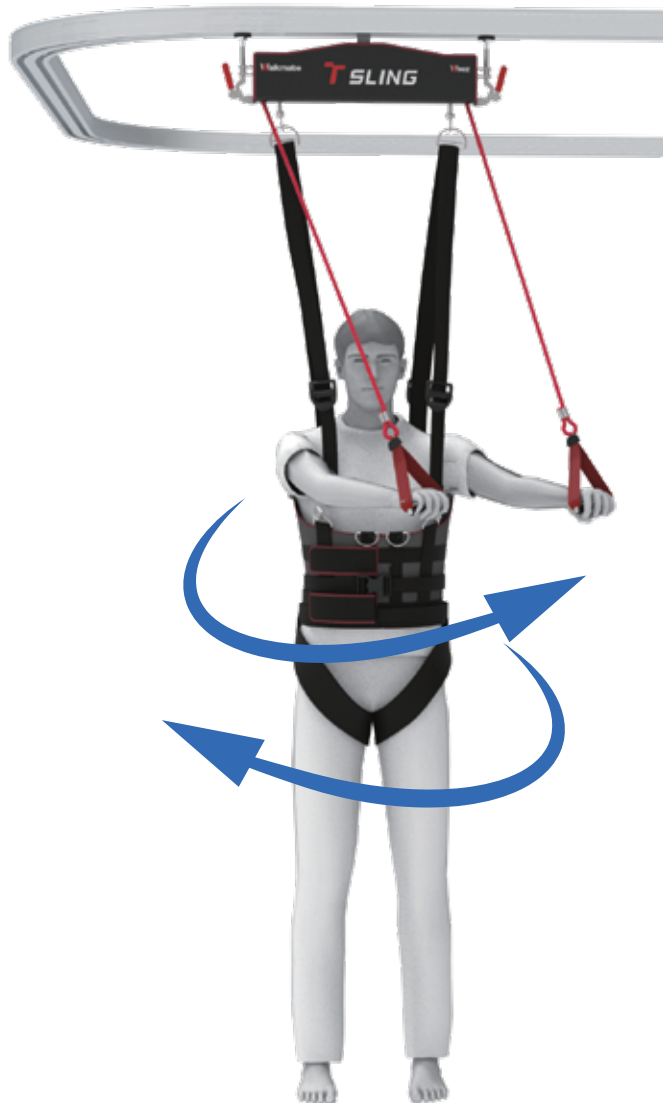

**T SLING**

Walkmate Only

Social Welfare Center  
(for day care and nursing homes)

※ **All slings in the world can only move horizontally.**

## | Features of Walkmate Sling

- 2 ropes
- No overhead rope

- Removable rope

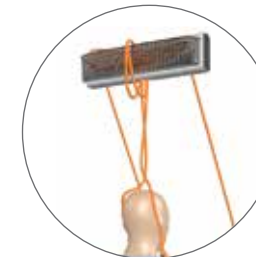

- Easy rope adjustment

## | Disadvantages of conventional slings

- 4 ropes
- The rope over the head is cumbersome

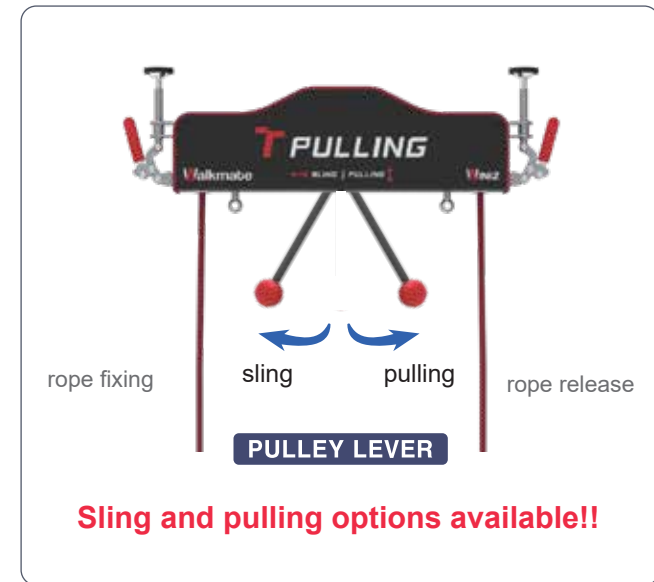

- Rope not removable
- Separate storage device and cumbersome storage

- Complex rope control

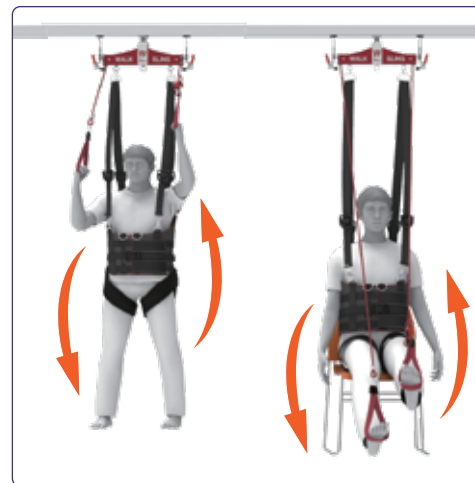

The **difference** between WALK SLING and T-PULLING!!

Walking exercise

Various rehabilitation exercises

✓ Walking exercise and rehabilitation exercise at the same time!!

The walk sling is a product suitable for walking exercises and light rehabilitation training.

- \* Various rehabilitation exercises are possible by fixing it to the rail
- \* Easy rope length adjustment for use on a variety of body types
- \* Both walking and various physical exercises are possible
- \* User-centered design

**Pulling** is only available at **Winiz's!**

**T PULLING**

Walkmate Only

World's first

Patent

**Sling exercise** + **Pulling exercise**

**2 IN 1 function (sling/pulling)**

✓ Sling and Pulling Selection  
Easily switch between **sling**  
and **pulling** with one handle lever

Easy rope length adjustment

Walking exercise

Various rehabilitation exercises

**Pulling** is a completely different product from **sling**
